

Sebastián Viglione Chiarlone

Junior Software Developer | Automation | Data | Web

Montevideo, Uruguay | +598 92 009 897 | sebaviglione10@gmail.com | <https://sebaviglione.com> | LinkedIn: <https://linkedin.com/in/sebaviglione> | GitHub: <https://github.com/SebaViglione>

PROFESSIONAL SUMMARY

Systems Engineering student with hands-on experience building internal tools, business automations and web solutions in a real company environment. I work with Python, JavaScript, SQL/PostgreSQL, REST APIs, webhooks, Docker, Linux, Git and n8n. Junior profile focused on fast learning, solving real problems and contributing to software development, data, automation or technical support teams.

WORK EXPERIENCE

Developer & Systems Technician | Grupo CPS - Montevideo, Uruguay | 12/2024 - Present

- Develop and maintain internal solutions that automate operational and commercial processes, improving tracking, documentation and information traceability.
- Integrate REST APIs, webhooks and JSON structures with Python, JavaScript and n8n to connect internal tools and business workflows.
- Build Python scripts for data extraction, cleaning and processing from external sources, including web scraping.
- Work with PostgreSQL, Linux, Docker, Bash, Git/GitHub for support, version control, deployment and maintenance.
- Gather requirements from internal users, document business needs and translate operational problems into functional software solutions.
- Develop institutional and commercial websites for digital presence, project promotion and customer acquisition.

SELECTED PROJECTS

Internal public tender monitoring system | Python, Web Scraping, PostgreSQL, Docker, n8n, Ollama

- Solution to detect, process and visualize relevant public tenders for the commercial team.
- Automated data extraction and conversion of unstructured text into JSON; local AI support for classification and analysis.

Internal architecture quoting tool | Business logic, calculation rules, Windows

- Internal application for estimating architectural components with formulas, editable parameters and item/chapter-level traceability.

Institutional, commercial and freelance web development | Portfolio and GitHub

- Websites for Grupo CPS and independent clients in Uruguay, focused on real business needs and digital presence.

TECHNICAL SKILLS

Languages: Python | JavaScript | SQL

Backend and integration: REST APIs | JSON | Webhooks | n8n

Data: PostgreSQL | Basic ETL | Web scraping

Tools and infrastructure: Linux | Docker | Bash | Git | GitHub

Web and AI: HTML/CSS | web development | Ollama | OpenAI API

EDUCATION

- Systems Engineering - Universidad de Montevideo | Ongoing student
- Technical High School Diploma in Computer Science - UTU Brazo Oriental | Graduated with excellent academic record

LANGUAGES AND STRENGTHS

Languages: Spanish: Native | English: Advanced C1 - Cambridge English: Advanced (CAE)

Strengths: fast learning | clear communication | autonomy | teamwork | adaptability | problem solving
